Week 2, Message 3, October 9, 2015

**Cyber Security Awareness is a Shared Responsibility – Become a Champion**

The world is more interconnected today than ever before. Government, private industry, educators, law enforcement, and especially you are needed to make the Internet a safer, more secure, environment. We do more online now than ever before – shop, bank, connect with loved ones, and pay our bills. Mobile devices — from phones and tablets to smart watches — can be extremely useful and convenient, but can also leave you vulnerable to potential threats. Unencrypted Wi-Fi networks are open to anyone—including cyber criminals—so keep sensitive data safe by never transmitting credit card numbers or other personal information on an unencrypted network. Learn more at [#CyberAware](http://www.dhs.gov/stopthinkconnect)

**Reminder: Cyber Security Awareness Training Opportunities**

## Phind the Phish

Phishing is when email purporting to be from a legitimate source attempts to trick you into volunteering your personal or credential-related information. These messages vary in content, but all claim to be from legitimate sources such as Ebay, your bank, PayPal, or a known provider you have used in the past.

If you receive such a message, you should treat it as spam and simply delete it.
